

# Hitch<sup>®</sup> 2.0

## Computer Switch Interface

Hitch 2.0 is a plug-and-play USB computer switch interface with inputs for up to five switches or one joystick with a 9-pin D plug. When used with switch accessible software, users can control their computer, actively learn, and have fun. For macOS Sierra, El Capitan, Yosemite, or Mavericks users, turn on Switch Control for full computer access with one or multiple switches. In addition, Hitch 2.0 includes a mouse control mode that enables a user to control the on-screen mouse cursor with a joystick or multiple switches.

# Hitch® 2.0

## Computer Switch Interface

---

### Switch & Joystick Compatible

Connect up to five switches with 3.5-mm / 1/8-in TS plugs or one joystick with 9-pin D plug to Hitch 2.0.

### Programmable

Hitch 2.0 allows you to record up to four keystrokes of your choice for a switch click. This is helpful for when switch accessible software requires non-standard keystrokes, programming media player functions with F-keys, or creating multi-key combinations.

### Simplified Design

Hitch 2.0 has a new simplified design that includes the most common keystrokes used with switch accessible software and mouse controls for general computer use.

### Switch or Mouse Control

Hitch 2.0 is more than just an easy-to-use switch interface. You can also easily create a joystick mouse or activate mouse controls with multiple switches for full computer use.
